**ABSTRACT**

A surgery table utilizing first and second sections which are  
hingedly attached to one another. First and second sections  
are also connected to supports apart from the hinged portion.  
An elevator moves one of the sections upwardly and down-  
wardly at the support. The resultant position of the frame  
formed by the first and second sections may take the  
configuration of a flat surface or an upwardly or downwardly  
oriented “vee”.
